NEWS RELEASE

Elbit Systems of America to Showcase Capabilities for Situational Awareness, Targeting and Precision Guided Munition Seekers at the Air Force Association's 33rd Annual Air Warfare Symposium and Technology Exposition

FORT WORTH, Texas (February 27, 2017) – On March 1-3, 2017, Elbit Systems of America, LLC, will exhibit its unique capabilities in pilot situational awareness, targeting and precision guided munition seekers at the Air Force Association's 33rd Annual Air Warfare Symposium and Technology Exposition. The event will take place at the Rosen Shingle Creek in Orlando, Fla. Elbit Systems of America's exhibit will be located in booth 1010.

"We are strategically focused on providing the decisive edge in combat pilot situational awareness and precise shooter-to-target capabilities," commented Raanan Horowitz, president and chief executive officer of Elbit Systems of America. "Our innovative cockpit technologies, helmet mounted displays, intelligent pilot interfaces and precision munition seekers improve mission effectiveness while protecting our warfighters."

Elbit Systems of America, a key supplier providing Air Force solutions, will have its advanced cockpit stations, intelligent pilot interfaces and precision guided munition seekers on display. Experts will be available to discuss the capabilities of each solution and how they enhance mission effectiveness and pilot safety. Highlights on display at the show include:

- **Unsurpassed Situational Awareness Provided by the F-35 Helmet Mounted Display System.** Elbit Systems of America will demonstrate the F-35 helmet and its family of helmet mounted display (HMD) systems that increase a pilot's situational awareness through the integration of three advanced technologies: head-up display, helmet-mounted display, and visor-projected or NVG eyepiece-projected night vision. With the HMD, F-35 pilots have a decisive edge in situational awareness, precision, mission effectiveness, and safety. The F-35 HMD is a member of a family of Visor Projected Helmet Mounted Displays that includes the Joint Helmet Mounted Cueing System (JHMCS) Classic, Digital JHMCS, and JHMCS II. These helmet mounted display systems are offered through a joint venture between Elbit Systems of America and Rockwell Collins, Rockwell Collins ESA Vision Systems LLC (RCEVS).
- **Advanced Cockpit Solutions – Improving Fighter Pilot's Situational Awareness.** For decades, Elbit System of America has supplied avionics for customers worldwide, optimizing tactical situation displays, processing advanced applications, and providing high definition formats for advanced sensor video presentations. During the event, Elbit Systems of America will demonstrate a revolutionized cockpit system for the F-15 aircraft. The display includes cutting edge mission processors, a head-up display, and a large area display with touch screen and picture-in-picture capabilities to provide increased situational awareness and mission effectiveness.
- **Combat-proven Precision Guided Munition Seekers.** Also on display are Elbit Systems of America's precision guided munition seekers. The semi-active laser and multi-mode seekers are designed for munitions such as the Laser Joint Direct Attack Munition (JDAM), Laser Small Diameter Bomb, and Griffin. Deployed in all current theaters of operation, the seekers increase detection range and are highly effective against static and high-speed moving targets.

Forward Looking Statement

This press release contains forward-looking statements (within the meaning of Section 27A of the Securities Act of 1933, as amended and Section 21E of the Securities Exchange Act of 1934, as amended) regarding Elbit Systems Ltd. and/or its subsidiaries (collectively the Company), to the extent such statements do not relate to historical or current fact. Forward-looking statements are based on management's expectations, estimates, projections and assumptions. Forward-looking statements are made pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995, as amended. These statements are not guarantees of future performance and involve certain risks and uncertainties, which are difficult to predict. Therefore, actual future results, performance and trends may differ materially from these forward-looking statements due to a variety of factors, including, without limitation: scope and length of customer contracts; governmental regulations and approvals; changes in governmental budgeting priorities; general market, political and economic conditions in the countries in which the Company operates or sells, including Israel and the United States among others; differences in anticipated and actual program performance, including the ability to perform under long-term fixed-price contracts; and the outcome of legal and/or regulatory proceedings. The factors listed above are not all-inclusive, and further information is contained in Elbit Systems Ltd.'s latest annual report on Form 20-F, which is on file with the U.S. Securities and Exchange Commission. All forward-looking statements speak only as of the date of this release. The Company does not undertake to update its forward-looking statements.
